DETAILED ACTION

Election/Restrictions

1. Claims 5-8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/3/07.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. Components such as means for agitation and means for addition of steam are critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). It is not clear whether these capabilities are required by the device since they occur only in the preamble.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1761

6. Claim 1 recites "means for elevating said outlet end... at an angle of between 0 to 90 degrees". It is not clear how an angle of 0° can be considered "elevated".

7. Claim 1 recites "An agitated direct steam continuous cooker apparatus". However, the body of the claim does not include means for agitation or means for addition of steam. It is not clear whether these components are required or not.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by the Smith evidence [IDS of 5/19/06].

Smith teaches a modular cooker comprising a body with an inlet end and outlet end, means for elevating the outlet end at an angle of 0-90°, and extensible supports.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Horn [Pat. No. 6,487,962], Horn [Pat. No. 6,578,468], Knight et al [Pat. No. 6,516,710], Martinsen et al [Pat. No. 6,071,474], Bly et al [Pat. No. 2,027,146], Bauer [Pat. No. 5,626,073], Hoeberigs [Pat. No. 5,371,829], Hantz et al [Pat. No. 4,889,042], Fountain [Pat.
